

*Advance Praise for*  
**SINGULARITY**

“*Singularity* is a swift, gripping novel with a goose-pimple mix of scary science and near-future action. An excellent debut from Bill DeSmedt — and I’ll be looking forward to his next one!”

— GREG BEAR, *New York Times* bestselling author; Hugo & Nebula award winner

“*Singularity* juggles Clancy, Crichton, and *The Da Vinci Code*. An innovative concept for an end-of-the-world thriller, with convincing research and locomotive pacing.

— KEVIN J. ANDERSON, *New York Times* bestselling author

“DeSmedt veers an action-packed thriller into perilous realms of black hole physics. The combination of adrenaline and intellect sizzles.”

— DAVID BRIN, *New York Times* bestselling author; Hugo & Nebula award winner

“*Singularity* is a three-bag homer of a book — a mind-bending techno-thriller set on the edge of tomorrow, an East-West political thriller chilling enough to refreeze the Cold War, and an old fashioned page-turner, of the sort you can’t decide whether to zip through, for the excitement, or to read slowly, to savor.”

— ANTHONY OLCOTT, Edgar and Silver Dagger Award nominee

“I very much enjoyed *Singularity*. Bill [DeSmedt] got the vast majority of the physics right, which is highly unusual — especially in a book that is such a good read.”

— KIP THORNE, Caltech physicist and national bestselling author

“*Singularity* is an uncommonly good science thriller, quite free of the poetic license writers take with the laws of nature in order to put together the yarn... I can certainly recommend it.”

— JACOB D. BEKENSTEIN, co-discoverer of Bekenstein-Hawking black-hole radiation

“Bill DeSmedt’s *Singularity* does time travel right... This is one of the most creative uses of primordial black hole theory in existence.”

— SCOTT A. HUGHES, MIT Department of Physics and Center for Space Research
